

Training as a developer has improved my systematic problem solving abilities, and I am seeking an exciting junior developer role in an innovative environment to support my learning and growth as a developer.

Technologies

Ruby , Javascript, Python, HTML5, CSS

Ruby on Rails, React, JQuery

Sinatra, SQL, Node

Rspec, Jest, Enzyme, Cypress.io, Detox

Education

Javascript

Birbeck University - London | 2018

Develop dynamic webpages using JavaScript

Data types, variables, arrays, conditionals, iteration, functions, etc. Input (forms), navigation, event-handling, Document Object Model, and JQuery

Advance Web Authoring

Birbeck University - London | 2018

Libraries, Stylesheets, Templates

Standards: HTML5, CSS3,

Semantic structure

Validation, Accessibility and browser compatibility testing

Web Development - Online Course

Treehouse Tech Inc | 2017

HTML

CSS

Javascript

Intro to Computer Science - Online Course

Udacity | 2017

Python

Computer science concepts

Computer

science basics

Work Experience

Makers

Full Stack Developer

Makers Academy is a 16-week intensive software bootcamp. I've enjoyed having my perceptions challenged about how code should be written and can't wait to put my skills into practice.

Processes: OOP, TDD, BDD, Agile, Extreme Programming, Pair Programming

Testing: RSpec, Capybara, Jasmine, Cypress.io, Enzyme, Jest, Detox

Languages: Ruby, JavaScript, Python, SQL, HTML, CSS

Frameworks: Sinatra, Express, Rails, React, Node

Brent Specialist Academy Trust

Teaching Assistant

Worked as a member of a diverse team of teaching staff, planning and delivering creative lessons tailored to children's wide-ranging learning difficulties. Directed colleagues in the absence of the Class Teacher.

Highgate Harriers Athletics Club

Lead Athletics Coach

Responsible for planning and overseeing training for junior athletes, including several promising young people who have won medals and titles across a range of disciplines at Regional, National and European Championship levels.

Strengths

Communication

I enjoy working in teams, and good communication within a team is essential for productivity and happiness in the workplace.

At Makers, I have used Slack to regularly communicate with colleagues, coaches and my mentor, and found this to be an important part of my workflow. I developed strong communication skills working in special education, where clear, concise communication was vital.

Quick learner

I relish opportunities to learn , not just in programming but in all aspects of life. I find that I learn best by doing. I have learned a lot from creating new projects, always approaching these with an optimistic can-do attitude.

I'm a strong believer in having a growth mindset;

new skills can be developed through dedication and hard work.

I maintain a daily task list on Trello, which helps me to stay organised and leads to better outcomes.

Able to motivate others

I have a proven record of motivating others, as coach for some of the most talented athletes in the Highgate Harriers Athletics Club.

I lead by example: I dedicated myself to studying programing in my spare time, around a full-time job in education and evening and weekend coaching commitments
