Black on blue is hard to read

Training as a developer has improved my systematic problem solving abilities, and I am seeking an exciting junior developer role in an innovative environment to support my learning and growth as a developer.

needs fleshing out, what interests you? what drives you?

Technologies

Ruby , Javascript, Python, HTML5, CSS

Ruby on Rails, React, JQuery

Sinatra, SQL, Node

Rspec, Jest, Enzyme, Cypress.io, Detox

Duplication?

Education

Javascript
Birbeck University - London | 2018
Develop dynamic webpages using JavaScript
Data types, variables, arrays, conditionals, iteration, functions, etc.
Input (forms), navigation, event-handling,
Document Object Model, and JQuery

Advance Web Authoring
Birbeck University - London | 2018
Libraries, Stylesheets, Templates
Standards: HTML5, CSS3,
Semantic structure
Validation, Accessibility and browser compatibility testing

Web Development - Online Course
Treehouse Tech Inc | 2017
HTML
CSS
Javascript

Intro to Computer Science - Online Course
Udacity | 2017
Python
Computer science concepts
Computer science basics

this can all be kept simple, its just education

Takes too much space

Marius Guei
Full Stack Developer

Clean linear CV is always easier to read, Remember, they read a lot of them

🏠 53 Oak Village, London, NW5 4QL *Not needed*

Work Experience

Makers
Full Stack Developer *→ timestamp this*
Makers Academy is a 16-week intensive software bootcamp. [I've enjoyed having my perceptions challenged about how code should be written and can't wait to put my skills into practice.]

Processes: OOP, TDD, BDD, Agile, Extreme Programming, Pair Programming *thats a new one!*
Testing: RSpec, Capybara, Jasmine, Cypress.io, Enzyme, Jest, Detox
Languages: Ruby, JavaScript, Python, SQL, HTML, CSS
Frameworks: Sinatra, Express, Rails, React, Node

Brent Specialist Academy Trust
Teaching Assistant *How long?*
Worked as a member of a diverse team of teaching staff, planning and delivering creative lessons tailored to children's wide-ranging learning difficulties. Directed colleagues in the absence of the Class Teacher. *font?*

Highgate Harriers Athletics Club
Lead Athletics Coach *How long*
Responsible for planning and overseeing training for junior athletes, including several promising young people who have won medals and titles across a range of disciplines at Regional, National and European Championship levels.

Strengths *May work better than open source projects*

Communication *These can be include*
I enjoy working in teams, and good communication within a team is essential for productivity and happiness in the workplace.

At Makers, I have used Slack to regularly communicate with colleagues, coaches and my mentor, and found this to be an important part of my workflow. I developed strong communication skills working in special education, where clear, concise communication was vital.

Quick learner
I relish opportunities to learn , not just in programming but in all aspects of life. I find that I learn best by doing. I have learned a lot from creating new projects, always approaching these with an optimistic can-do attitude.
 I'm a strong believer in having a growth mindset;

new skills can be developed through dedication and hard work.
I maintain a daily task list on Trello, which helps me to stay organised and leads to better outcomes.

Able to motivate others *Part of this can go in top*
I have a proven record of motivating others, as coach for some of the most talented athletes in the Highgate Harriers Athletics Club.

I lead by example: I dedicated myself to studying programing in my spare time, around a full-time job in education and evening and weekend coaching commitments

Dont be afraid to use more than one page, Interesting stuff on first page
